

## BFT- 15 Portable Medical Refrigerator Unit and Base Unit

The BFT-15 portable medical BioFridge with cart was designed for use within hospitals, laboratories and medical facilities.

*The internal power supply will run all units for up to (18) eighteen hours. The time needed to recharge a 100% depleted battery is (5) five hours. The unit has an internal fan that ensures an even temperature throughout the cold chamber.*

*All units have internal and external lids, and are fully transportable with locking casters.*

*Displayed on the cart is: the UPS charge indicator. Displayed on the front of the refrigeration units are: the UPS battery-status, the NIST traceable Wireless Temperature Monitoring System, and the 110V input receptacle. (The input receptacle powers both the refrigeration unit and the on-board UPS.)*
